## Abstracts

This report studies the global Slope Stabilisation & Erosion Control Product market status and forecast, categorizes the global Slope Stabilisation & Erosion Control Product market size (value & volume) by key players, type, application, and region. This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

This report we mainly researched the geocells and geotextiles which used in Slope Stabilisation & Erosion Control Product. Geocells and geotextiles are widely used in construction for erosion control, soil stabilization on flat ground and steep slopes, channel protection, and structural reinforcement for load support and earth retention. Asia Pacific contributed to over 40% of the global industry in 2015, making it the largest market. This trend is expected to continue over the projected period owing to rising government expenditure for infrastructure development primarily in developing countries including China and India.

On-going projects related to landscape restoration in various developed countries including Japan and U.S. are expected to increase use of geotextiles over the next eight years. The product is employed in projects in other parts of the world such as the transformation of wastewater impoundment into Qingjing Lake located in Singapore. These factors are expected to have a positive impact on the industry over the forecast period.

The global Slope Stabilisation & Erosion Control Product market is valued at 1420 million US\$ in 2017 and will reach 2550 million US\$ by the end of 2025, growing at a CAGR of 7.6% during 2018-2025.
