Abstracts

Android POS is the POS device combined with the technology of Android operating system.
Unlike the traditional POS terminal, Android POS Device can link itself to several checkout terminals in your counter and operated by main computer. With the Android technologies added, the device is programmed; it can track your usage, record sales, monitor updates of dollar changes, calculate orders and payments, and tally inventory sales based on items saved in your system. This POS system gives you control on your business where security control on the cash register have and limit the number of employees who can open this. The Android POS Device is capable of keeping tracks and records of company's sales. Checking the business's profit is much easier compared to tedious manual checking. It can help to improve marketing strategies and technique by analyzing the condition of the business. That's why even small-scale businesses need the help of such device to make their job a lot easier and faster.
The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.
North America, especially the United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Smart Mobile POS.
Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Smart Mobile POS 4900 market in 2020.
COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.
