Abstracts

This report studies the global Sodium Methoxide market status and forecast, categorizes the global Sodium Methoxide market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Sodium Methoxide is a chemical compound with the formula CH_3ONa . It is divided into Sodium Methoxide powder and Sodium Methoxide solution.

Sodium Methoxide Solution in Methanol is a clear viscose liquid that smells like alcohol. Sodium Methoxide powder is a white powdered solid that does not have an odor. The substance is flammable, but is not explosive; it can decompose when exposed to high heat. It is very hygroscopic and decomposes quickly. It is only stable under exclusion of air and moisture. It is typically sold as a 25% to 30% solution in methanol.

First, Sodium Methoxide is a kind of strong base, can be used in agrochemicals industry, pharmaceuticals industry, biofuels industry and other fields. Especially can be used in biofuels industry, biofuels can be used to replace part oil in the world. So Sodium Methoxide is a kind of huge market potential chemical product.

Second, the main raw materials of Sodium Methoxide are sodium metal or caustic soda and methanol. With the development of the downstream industries, Sodium Methoxide production keeps increase recent years, because some sodium metal and caustic soda manufacturers entered the Sodium Methoxide industry

Third, all manufactures in the world are committed to the improvement of product. Recently some manufactures of China can almost catch up with the world's leading technology.

Fourth, the import and export percent of this industry is not high. Because many international manufactures expand their business through building factories or investments.

Fifth, Sodium Methoxide industry is affected by the economy and policy. With the global economic recovery, more and more people pay attention to rising environment standards, especially in underdevelopment regions that have a large population and fast economic growth, the need of Sodium Methoxide will increase. Sixth, we tend to believe Sodium Methoxide technology has been very mature and advanced, and the consumption increasing degree will show a smooth curve. On product prices, the slow downward trend in recent years will maintain in the future, as competition intensifies, prices gap between different brands will go narrowing. Similarly, there will be fluctuation in gross margin.

Seventh, the global Sodium Methoxide production will increase to 1000 KMT in 2015, from 673 K MT in 2010, it is estimated that the global Sodium Methoxide demand will develop with an average growth rate of 2% in the coming five years.

The global Sodium Methoxide market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025.
