Abstracts

Sodium selenite is a chemical form of selenium, which is a mineral that naturally exists in the crust of the earth. This supplement is an inorganic combination of selenium, oxygen, and sodium.

Sodium selenite is a colorless toxic solid. Because selenium is an essential element, it is mainly used in feed additives and food industry. Also, it is mainly used in the manufacture of colorless glass. Owing to its toxicity, it is forbidden in Japan and some Europe countries for food ingredient. Japan had just allowed sodium selenite use in feed additives.

Raw material of sodium selenite are selenium dioxide (or crude selenium powder) and sodium hydroxide. Also it pollutes environment during the production. During past five years, price of sodium selenite decreased since price of sodium powder had decreasing.

There are only a few manufacturers all over the world, such as II-VI, Retorte, Orffa, Vital, Jinhua and Ahpstar. Downstream demand for sodium selenite seems steady those years. So, we speculate that there will not be too many manufacturers entering this industry in the future.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Sodium Selenite 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events

restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Sodium Selenite 3900 industry.

Based on our recent survey, we have several different scenarios about the Sodium Selenite 3900 YoY growth rate for 2020.
