Abstracts

This report studies the global Sodium Selenite market status and forecast, categorizes the global Sodium Selenite market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Sodium selenite is a chemical form of selenium, which is a mineral that naturally exists in the crust of the earth. This supplement is an inorganic combination of selenium, oxygen, and sodium.

Sodium selenite is a colorless toxic solid. Because selenium is an essential element, it is mainly used in feed additives and food industry. Also, it is mainly used in the manufacture of colorless glass. Owing to its toxicity, it is forbidden in Japan and some Europe countries for food ingredient. Japan had just allowed sodium selenite use in feed additives.

Raw material of sodium selenite are selenium dioxide (or crude selenium powder) and sodium hydroxide. Also it pollutes environment during the production. During past five years, price of sodium selenite decreased since price of sodium powder had decreasing.

There are only a few manufacturers all over the world, such as II-VI, Retorte, Orffa, Vital, Jinhua and Ahpstar. Downstream demand for sodium selenite seems steady those years. So, we speculate that there will not be too many manufacturers entering this industry in the future.

The global Sodium Selenite market is valued at 29 million US\$ in 2017 and will reach 100 million US\$ by the end of 2025, growing at a CAGR of 16.6% during 2018-2025. The major players covered in this report
