This report studies the global Solar Charger market status and forecast, categorizes the global Solar Charger market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A solar charger employs solar energy to supply electricity to devices or charge batteries. They are generally portable. Solar chargers can charge lead acid or Ni-Cd battery banks up to 48 V and hundreds of ampere-hours (up to 4000 Ah) capacity. Such type of solar charger setups generally use an intelligent charge controllers. These devices have high degree of flexibility and highest efficiency as compared to any other green charger. The market for Solar Charger is highly fragmented with players such as Anker, GoalZero, Letsolar, RAVPower, ECEEN, Powertraveller, Solio, LittleSun, Voltaic Systems, YOLK, Solar Technology International, NOCO, Instapark, Xtorm, Allpowers Industrial International, Hanergy and so on.

The industry is expected to remain innovation-led, with frequent acquisitions and strategic alliances adopted as the key strategies by the players to increase their industry presence. Market stays in mature period with a clear concentration. There hardly to have obvious technology breakthrough except deeper system function integration. Meanwhile, optimize product mix and further develop value-added capabilities to maximize margins. Manufacturers can take advantage of this situation by reinforcing their production units and supply-chains to avoid any delay in production turn-around-times (TAT) and supply-lead-times.

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area, the future will still have more new investment enter the field. Even so, the market is intensely competitive. The study group recommends the new entrants just having money but without technical advantage and

upstream and downstream support do not to enter into this field.

The global Solar Charger market is valued at 1100 million US\$ in 2017 and will reach 6240 million US\$ by the end of 2025, growing at a CAGR of 24.2% during 2018-2025.
