Abstracts

This report studies the global Solar Photovoltaic Cell market status and forecast, categorizes the global Solar Photovoltaic Cell market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Common battery technologies used in today's PV systems include the valve regulated lead-acid battery— a modified version of the conventional lead-acid battery, nickel-cadmium and lithium-ion batteries. Compared to the other types, lead-acid batteries have a shorter lifetime and lower energy density. However, due to their high reliability, low self-discharge as well as low investment and maintenance costs, they are currently the predominant technology used in small-scale, residential PV systems, as lithium-ion batteries are still being developed and about 3.5 times as expensive as lead-acid batteries.

Thin-film technology is expected to grow faster as compared to crystalline silicon due to several advantages.

The global Solar Photovoltaic Cell market is valued at xx million US\$ in 2017 and will reach xx million US\$ by the end of 2025, growing at a CAGR of xx% during 2018-2025. The major players covered in this report
