Abstracts

This report studies the global Static Random Access Memory (SRAM) market status and forecast, categorizes the global Static Random Access Memory (SRAM) market size (value & volume) by key players, type, application, and region. This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

SRAM (static RAM) is random access memory (RAM) that retains data bits in its memory as long as power is being supplied. Unlike dynamic RAM (DRAM), which stores bits in cells consisting of a capacitor and a transistor, SRAM does not have to be periodically refreshed. Static RAM provides faster access to data and is more expensive than DRAM. SRAM is used for a computer's cache memory and as part of the random access memory digital-to-analog converter on a video card.

The global SRAM market is relatively concentrated, and majorly dominated by the large international players in the market. The market is highly capital-intensive, which poses a stiff challenge to local players. These players find it difficult to compete with international vendors in terms of technology, specifications, and services. The top six companies operating in the global SRAM market are Cypress, Renesas, ISSI, GSI, IDT and Samsung. The world's largest manufacturer is Cypress which accounted for approximately 42.29% of the global revenue of SRAM in 2016.

In terms of geography, the USA region led the global SRAM industry and accounted for approximately 76.98% of the market in 2016, in terms of revenue, and USA will continue to lead the market in the future.

The global Static Random Access Memory (SRAM) market is valued at 420 million US\$ in 2017 and will reach 350 million US\$ by the end of 2025, growing at a CAGR of -2.2% during 2018-2025.
