## Abstracts

This report studies the global Steam Valve market status and forecast, categorizes the global Steam Valve market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Steam Valves are used in steam system to adjust or switch steam flow, filter impurity in steam, prevent steam backflow, etc. Steam valves include a lot of valves like steam trap valves, steam plunger valves, steam reducing valves, safety valves, etc.

First, for industry structure analysis, the Steam Valve industry is not concentrated. These manufacturers range from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 17.47% of the revenue market. Regionally, North America is the biggest production value area, also the leader in the whole Steam Valve industry.

Second, for price trend analysis, a key variable in the performance of Steam Valve producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Third, for forecast, the global Steam Valve revenue would keep increasing with annual growth rate with 1~4%. We tend to believe that this industry still has a bright future, considering the current demand of Steam Valve.

The global Steam Valve market is valued at 7720 million US\$ in 2017 and will reach 8930 million US\$ by the end of 2025, growing at a CAGR of 2.1% during 2018-2025.
