Abstracts

Steel Powders include stainless steel powder, alloy steel powder, and general steel powder. Steel Powders are widely used in machinery, aerospace, chemical industry, powder metallurgy, magnetic materials, and others.

Steel powder has two major types, such as atomized powder and reduced powder. Due to the good coactivity, high purity and high compressibility of atomized powder, it will have a huge market potential. Steel powder is widely used in automobile, machinery, chemical industry, magnetic materials and others. As the demand increases rapidly for downstream industries, the demand for steel powder will correspondingly increase. The increased consumption of steel powder is expected to continue during the remaining years of the next five years. Iron powder industry will usher in a stable growth space.
