## Abstracts

This report studies the global Sulfosuccinate market status and forecast, categorizes the global Sulfosuccinate market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Sulfosuccinates are metal (sodium) salts of alkyl ester of sulfosuccinic acid.

Sulfosuccinate surfactants possess excellent foaming, wetting, emulsifying, and solubilizing properties. Additionally, these surfactants exhibit high surface activity, biodegradability, and low critical micelle concentration. They are used in various types of cleansing formulations, household detergents & cleaners, industrial cleaners, textiles, pharmaceuticals, polymers, paints & coatings, leather, printing, and agriculture.

Surfactants may act as detergents, wetting agents, emulsifiers, foaming agents, and dispersants. There are a variety of surfactants on the market. Sulfosuccinates are considered very mild, with good foaming and detergent properties. Considering the cost, companies may choose cheap anionic surfactants to replace sulfosuccinates, especially in developing countries.

Green surfactants from waste biomass and agricultural raw materials are gaining popularity as companies look to move away from petroleum feedstock. More companies are expected to use sustainable sourced materials. For instance, Clariant's GlucoTain range of sugar-based surfactants is made from RSPO certified palm oil and coconut oils.

Personal care and home care companies are looking at alternatives to synthetic surfactants and emulsifiers because of growing pressure to use sustainable materials. Consumer demand for natural & organic products, as well as growing awareness of the environmental & health impacts of contentious chemicals are driving this change. Consumers are generally quick-change, to get or use newfangled products, better experience, better convenience and more quicker; to find and meet the needs of

consumers, and exceeding expectation, better service. The world changes quickly, especially in mobile internet and consumer electronics, and now the mobile internet and consumer electronics are changing the traditional sectors, to more efficient, more cheaper and powerful.

The global Sulfosuccinate market is valued at 410 million US\$ in 2017 and will reach 510 million US\$ by the end of 2025, growing at a CAGR of 2.6% during 2018-2025.
