Abstracts

The superalloy market is concentrated. The numbers of major manufacturer in this field would be no more than 50. For the past 20 years, superalloy has been a niche market, and advanced technology and sufficient raw material supply is vital in this industry. Consequently, only limited companies are able to produce superalloy in their own land. Regionally, North America is the biggest consumption region of superalloy, about 41.49% of the global superalloy consumption, and the market share of Europe is also considerable. Consumption in China is more separated, but in fast development.
