## Abstracts

This report studies the global Supercapacitors market status and forecast, categorizes the global Supercapacitors market size (value & volume) by key players, type, application, and region. This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

Supercapacitors are a high-capacity capacitor with capacitance values much higher than other capacitors (but lower voltage limits) that bridge the gap between electrolytic capacitors and rechargeable batteries. It is widely used in Energy Storage, Power System and Electronic Device.

From the manufacturers of products point of view, the competition between core enterprises is not direct, their products are not completely repeated, with different emphasis and competitive advantage in the market segments.

In terms of product prices, as the technology and application level matures, the overall price of supercapacitor products tends to be rational, and the current price range of products is basically kept within 10% per year. In particular, small-capacity supercapacitor products have basically matured.

The global Supercapacitors market is valued at 1670 million US\$ in 2017 and will reach 7180 million US\$ by the end of 2025, growing at a CAGR of 20.0% during 2018-2025.
