This report studies the global Switched Reluctance Motors market status and forecast, categorizes the global Switched Reluctance Motors market size (value & volume) by key players, type, application, and region.

This report focuses on the top players in North America, Europe, China, Japan, Southeast Asia India and Other regions (Middle East & Africa, Central & South America).

The switched reluctance motor (SRM) is a type of a stepper motor, an electric motor that runs by reluctance torque. Unlike common DC motor types, power is delivered to windings in the stator (case) rather than the rotor. This greatly simplifies mechanical design as power does not have to be delivered to a moving part, but it complicates the electrical design as some sort of switching system needs to be used to deliver power to the different windings. With modern electronic devices, precisely timed switching is not a problem, and the SRM is a popular design for modern stepper motors. Its main drawback is torque ripple.

Currently, there are many producing companies in the world. The main market players are Nidec Corporation, AMETEK, VS Technology, Shandong Kehui Power Automation etc. The production value of Switched Reluctance Motors is about 422.0 Million USD in 2016.

North America is the largest consumption of Switched Reluctance Motors, with a sales market share nearly 31.3% in 2016.

The second place is Europe; following North America with the sales market share over 29.05%. Asia Pacific is another important consumption market of Switched Reluctance Motors.
