Abstracts

Syndiotactic Polystyrene (or Syndiotactic Polystyrene, SPS) is a kind of crystal polystyrene engineering plastic which is different from normal polystyrene's in spatial structure. The structure of the product is regularly alternately spaced and it makes its properties different from normal polystyrene especially the resistance of heat and drug. Syndiotactic Polystyrene provides a good balance and competes well against other materials in a wide variety of applications.

The Global Production Scale of Syndiotactic Polystyrene is small. Idemitsu Kosan and LG Chem are the only two manufacturers of pure Syndiotactic Polystyrene in the world now.

The Syndiotactic Polystyrene is used by adding other materials such as glass fiber to enhance its property. Both Idemitsu and LG Chem supply SPS compound in the world. Idemitsu has SPS compounds plants in Japan, China, the US and Germany and supplies the product with the brand name XAREC. LG Chem has SPS compound plant in South Korea. LG Chem supplies the products with the brand name LUSEP.

Idemitsu is the first company in the world to launch commercial production of the Syndiotactic Polystyrene and now Idemitsu is the world leader of the product in the world.

The entrance barrier of the Syndiotactic Polystyrene industry is the technology hurdle in the production of metallocene catalysts. Idemitsu, Dow Chemical and LG Chem are the few companies who have the technology of the production and application of the metallocene catalysts for the polymerization of Syndiotactic Polystyrene.

Global production of Syndiotactic Polystyrene is 8.92 K MT in 2015. Due to technical limitations, the development in Syndiotactic Polystyrene industry is slowly. In the future, we guess that the production will increase to 9.08 K MT by 2021.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a

public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Syndiotactic Polystyrene 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Syndiotactic Polystyrene 3900 industry.
