## Abstracts

Synthetic pyrethroids are analogues of the natural pyrethrins and have a broad spectrum of activity against external parasites (flies, ticks, mites, fleas, lice, mosquitoes, etc.). The insecticidal properties of pyrethrins are derived from ketoalcoholic esters of chrysanthemic and pyrethroic esters of chrysanthemic and pyrethroic acids.

In the world wide, synthetic pyrethroids (TC) manufactures mainly distribute in China and India. China has the largest production in the world and exports worldwide, like Yangnong Chemical and Jiangsu RedSun, both have large production capacity. As to western countries?the companies there usually import synthetic pyrethroids (TC) for the manufacture of pesticides and insect repellent.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
