Abstracts

Today's access control systems are designed to help control and manage authorized access into secure areas. Ensuring that every individual has properly presented a valid ID or successfully cleared biometric identification is a major challenge that security professionals face. The prevention of tailgating and piggybacking (in other words, cheating or outsmarting the system) is a problem existing solutions do not sufficiently address. Tailgating detection system works with security systems by intercepting the signal emitted from the ID reader and determines the status of the access point. The sensor then establishes whether or not a single individual is attempting entry, and in the event of dual or unauthorized entry, provides the necessary output by locking the door or triggering an alarm, thereby adding a security layer to the existing access control system.

At present, in the developed countries the tailgating detection industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in the Europe and United States. Meanwhile, foreign companies have more mature equipment, strong R&D capability; the technical level is in a leading position. Worldwide, Europe is the largest market of tailgating detection currently. The market in developing countries is relatively small, but as the safety consciousness is increasing, the market in these regions is growing at a higher speed.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Tailgating Detection market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Tailgating Detection industry.
