## Abstracts

Therapeutic contact lenses serve the purpose of protection of eyes from irritation and friction which is caused by rubbing of eyelids and some other functions such as sealing, healing, maintenance of corneal hydration, and pain relief and thereby helping the cornea to heal in conditions such as corneal diseases or eye injury which leads to an increase in growth of the demand for therapeutic contact lenses. Therapeutic contact lenses are soft contact lenses and do not help in vision correctness because they do not have any focusing power that is why they are mainly used for healing purpose which complements the demand for therapeutic contact lenses in the market.

Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Therapeutic Contact Lenses market research.
