Abstracts

Tilapia is the common name for nearly a hundred species of cichlid fish from the tilapiine cichlid tribe. Tilapia are mainly freshwater fish inhabiting shallow streams, ponds, rivers and lakes and less commonly found living in brackish water.

Major factors driving growth of this market include the rising population, rising awareness of healthy consumption and growth in per capita income in emerging markets. However, pond rent increases, water pollution, lack of good breeding technology in emerging economies, and lack of technology for deep processing of food are expected to restrain the growth of this market.

Asia-Pacific market is expected to become the fastest growing market, increasing product availability is the key point.

Asia-Pacific is poised to grow at the highest CAGR during the forecast period owing to rising awareness about health care, increasing disposable income in this region, and rising focus of prominent players on the APAC market increasing diversification of product processing.

The average price will fall further

The product average price declined in the past few years due to the technology development, the average price will keep this trend in the few future years due to increasing mature manufacturing technology and lowering cost of raw materials. Strong market competition is resulting in annual 2 percent price erosion.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Tilapia 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight

cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Tilapia 3900 industry.

Based on our recent survey, we have several different scenarios about the Tilapia 3900 YoY growth rate for 2020. The probable scenario is expected to grow by a xx% in 2020 and the revenue will be xx in 2020 from US\$ 12140 million in 2019. The market size of Tilapia 3900 will reach xx in 2026, with a CAGR of xx% from 2020 to 2026.
