A trencher is a piece of construction equipment used to dig trenches, especially for laying pipes or cables, for installing drainage, or in preparation for trench warfare.

Trenchers may range in size from walk-behind models, to attachments for a skid loader or tractor, to very heavy tracked heavy equipment.

First, the trencher industry concentration is high. North America is the biggest producer and consumer of trencher. There are no more than fifty manufacturers in the world, and high-end products mainly come from USA and European.

In the world wide, giant manufactures mainly distribute in Europe and America. American and Europe has a long history and unshakable status in this industry, like Ditch Witch, Vermeer and Tesmec. They have perfect products.

Second, the import and export percent of this industry is high. Also, some foreign companies are willing to set plants in China due to its low labor price and more opportunities.

The global Trencher market is valued at 45 million US\$ in 2017 and will reach 50 million US\$ by the end of 2025, growing at a CAGR of 1.4% during 2018-2025.
