Abstracts

Trulicity (dulaglutide) is a diabetes medication for adults with type 2 diabetes that is injected once a week to help lower blood sugar.

According to QYResearch's new survey, global Trulicity market is projected to reach US\$ 13270 million in 2029, increasing from US\$ 6741 million in 2022, with the CAGR of 8.6% during the period of 2023 to 2029. Influencing issues, such as economy environments, COVID-19 and Russia-Ukraine War, have led to great market fluctuations in the past few years and are considered comprehensively in the whole Trulicity market research.

The Fc Fusion Protein market is primarily driven by the growing demand for innovative therapies that offer enhanced efficacy and extended therapeutic effects. Fc Fusion Proteins, which combine the Fc region of an antibody with a target protein, provide longer half-lives and improved pharmacokinetics. The increasing emphasis on targeted therapies and personalized medicine, coupled with advancements in biotechnology and protein engineering, contributes to market growth. Moreover, the demonstrated potential of Fc Fusion Proteins in treating various diseases, such as cancer, autoimmune disorders, and rare diseases, further propels adoption. However, challenges include optimizing protein design for maximum therapeutic benefit and minimizing potential immunogenicity or unwanted interactions. Navigating regulatory approvals, ensuring cost-effectiveness, and developing robust manufacturing processes are ongoing concerns. The market's success relies on continuous innovation in protein engineering, collaborations between biopharmaceutical companies and medical researchers, and comprehensive education on the benefits and potential risks of Fc Fusion Protein therapies while addressing the evolving challenges associated with targeted therapy development and patient access.
