Abstracts

This report studies the global Varactor Diodes market status and forecast, categorizes the global Varactor Diodes market size (value & volume) by manufacturers, type, application, and region. This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Varactor Diodes also known as a variable capacitance diode, varicap diode or variable reactance diode, is a diode that has a variable capacitance which is a function of the voltage that is impressed on its terminals. Tuning / varactor diodes are operated reverse-biased, and therefore no current flows. However, since the thickness of the depletion zone varies with the applied bias voltage, the capacitance of the diode can be made to vary. Usually, the capacitance is inversely proportional to the depletion region thickness and the depletion region thickness is proportional to the square root of the applied voltage. Therefore, the capacitance is inversely proportional to the square root of the voltage applied to the diode.

This report is focused on global varactor diode market. Varactor diodes are semiconductor devices that are widely used in the electronics industry and are used in many applications where a voltage controlled variable capacitance is required. They provide a method of varying the capacitance within a circuit by the application of a control voltage.

The global varactor diodes market size is estimated to reach 4894.44 Million Pieces in 2016, growing at a CAGR of 4.49% from 2012 to 2017. Global varactor diodes market revenue is estimated to reach \$ 629.65 million by the end of 2017 and is expected to reach USD 732.76 million by 2022, with a CAGR of 4.86% from 2017 to 2022.

The production market is relatively concentrated. Major manufacturing regions is concentrated in the China, USA and Europe. China is the largest production area, with

an annual production volume of 1262.97 Million Pieces in 2016, taking about 31% of total market output. USA and Europe followed as the second and third market production area, with market share of 22.95% and 18.85% separately.

The global Varactor Diodes market is valued at 630 million US\$ in 2017 and will reach 790 million US\$ by the end of 2025, growing at a CAGR of 2.9% during 2018-2025.
