This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

A Variable Displacement Pump is a type of mechanical-electrical motor placed in a fluid channel. Built either to generate electrical power from the natural flow of fluid past it or to apply mechanical force to make stationary fluid flow in a pipe gives the variable displacement pump a dual use — adjustable capability. Such pumps have versatile applications because they can be set to capture the maximum amount of hydraulic fluid energy as the velocity of fluid flow in a channel dynamically changes, or they can be switched to applying mechanical energy powered by electricity to increase fluid flow. According to our research and analysis, we know that the companies located at North America and China is major leader in the variable displacement pump international market; the China's company is immature technology, there is a large market space in the China market, meanwhile, we find that there is a big gap between abroad brand and domestic brand on the price.

Variable displacement pump product demand market there is also a certain space in the next few years, especially the China market, the demand of Variable Displacement Piston Pump is increasing slowly with the rapidly development of Electricity industry.

The global Variable Displacement Pumps market is valued at 6750 million US\$ in 2017 and will reach 7800 million US\$ by the end of 2025, growing at a CAGR of 1.8% during 2018-2025.
