## Abstracts

This report studies the global Well Completion Equipment market status and forecast, categorizes the global Well Completion Equipment market size (value & volume) by manufacturers, type, application, and region.

This report focuses on the top manufacturers in North America, Europe, Japan, China, and other regions (India, Southeast Asia, Central & South America, and Middle East & Africa).

Completion, in petroleum production, is the process of making a well ready for production (or injection). This principally involves preparing the bottom of the hole to the required specifications, running in the production tubing and its associated downhole tools as well as perforating and stimulating as required. Sometimes, the process of running in and cementing the casing is also included.

Well completion equipment industry concentration is relatively high. The largest producer is Baker Hughes, accounting for 23.02% percent market share in value in 2015, followed by Halliburton, Schlumberger, Weatherford International, these four big companies accounting for 71.54% of total market revenue in 2015. The industry competitive landscape is relatively stable.

The well completion equipment market scale is likely to continue to increase in the next few years. Although sales of well completion equipment brought a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and downstream support do not enter into the well completion equipment field abruptly.

The global Well Completion Equipment market is valued at 4310 million US\$ in 2017 and will reach 7670 million US\$ by the end of 2025, growing at a CAGR of 7.5% during 2018-2025.
