This report focuses on the top manufacturers in North America, Europe, Japan, China, India, Southeast Asia and other regions (Central & South America, and Middle East & Africa).

Whey is the watery liquid that remains after the coagulation of the casein proteins in cheese making. Whey contains most of the lactose and about 20% of the protein in milk. It is mainly consisted of lactose, proteins and minerals.

The technical barriers of whey are low, and the whey market concentration degree is relatively lower. The manufacturing bases scatter around the world close to the milk and cheese manufacturing bases; the main milk and cheese producers are distributed in USA, Europe, and New Zealand, such as European producers like Euroserum FrieslandCampina and Lactalis Ingredients etc., Hilmar Cheese Company Leprino Foods Company and Saputo Ingredients etc. from USA, and Fonterra from New Zealand.

The key factors driving the growth of the aforementioned industry are health awareness and household income. With the improvement of people's awareness of health and household income, the increased consumption of whey is expected to continue during the remaining years of the forecast period of 2016-2021. Whey industry will usher in a huge growth space.

There are companies adding new capacities and aims at the cost and quality leadership which shall improve profitability. As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. A significant growth opportunity is attracting more manufacturers to enter the industry. The Competition in Whey market will become more intense.

The global Whey market is valued at 86200 million US\$ in 2017 and will reach 117000
