Abstracts

Wireless Infrastructure can be defined infrastructure required to facilitate wireless networking. Wireless networking is a method by which homes, telecommunications networks and enterprise (business) installations avoid the costly process of introducing cables into a building, or as a connection between various equipment locations and communicate with each other.

The 'Infrastructure' link of the Wireless Industry Value Chain is divided into three subgroups (Materials and Process Equipment; Components, and Equipment and Device Makers). In our report, wireless infrastructure Equipment and Device is been analyzed, which based on all existing generations of wireless network technology, including radio access networks (RANs), base transceiver stations (BTSs), mobile softswitching, packet core equipment and E-UTRAN macrocells and so on.

The Wireless Infrastructure market is currently in a phase of transition as mobile operators seek to address increasing mobile traffic demands amidst economic uncertainties. This paradigm shift is bringing new challenges and opportunities to infrastructure vendors.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Wireless Infrastructure market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the

supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Wireless Infrastructure industry.

Based on our recent survey, we have several different scenarios about the Wireless Infrastructure YoY growth rate for 2020. The probable scenario is expected to grow by a xx% in 2020 and the revenue will be xx in 2020 from US\$ xx million in 2019. The market size of Wireless Infrastructure will reach xx in 2026, with a CAGR of xx% from 2020 to 2026.
