Abstracts

Watch is a small timepiece intended to be carried or worn by a person. It is designed to keep working despite the motions caused by the person's activities. A wristwatch is designed to be worn on a wrist, attached by a watch strap or other type of bracelet. At present, in the foreign industrial developed countries the wrist watch industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in Switzerland, Japan, etc. Meanwhile, foreign companies have more advanced equipment, strong R & D capability, the technical level is in a leading position. But foreign companies' manufacturing cost is relatively high, compared with Chinese companies, so the manufacturing cost has competitive disadvantage, as the Chinese wrist watch production enterprise technology continues to improve, their share in the international market will increase competitiveness..

Chinese wrist watch industry has developed into a national industry with certain research and production capacity, industry product mix has gradually improved, currently China has become international wrist watch largest manufacture country, in addition to middle and low wrist watch products, some leading companies have been able to provide some high-end wrist watch products, so they have already had a competitive edge in the international arena.

With the rapid growth of the national economy as well as the rapid development of downstream industries, Chinese wrist watch market demand is exuberant so it can provide a good opportunity for the development of wrist watch market and technology. Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area and the future will still have more new investment entering the field.

Along with the development of Chinese domestic equipment, Chinese domestic equipment has been very mature and advanced, and the performance distance has been shortened compared with the imported equipment.

Although wrist watch brings a lot of opportunities, the study group recommends the new entrants just having money but without technical advantage and upstream and

downstream support do not to enter into this field.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency. The global impacts of the coronavirus disease 2019 (COVID-19) are already starting to be felt, and will significantly affect the Wrist Watch 3900 market in 2020.

COVID-19 can affect the global economy in three main ways: by directly affecting production and demand, by creating supply chain and market disruption, and by its financial impact on firms and financial markets.

The outbreak of COVID-19 has brought effects on many aspects, like flight cancellations; travel bans and quarantines; restaurants closed; all indoor events restricted; over forty countries state of emergency declared; massive slowing of the supply chain; stock market volatility; falling business confidence, growing panic among the population, and uncertainty about future.

This report also analyses the impact of Coronavirus COVID-19 on the Wrist Watch 3900 industry.
