Abstracts

Zirconium oxide (also known as zirconia or as zirconic anhydride, ZrO_2) is a toxic white powder that is insoluble in water but soluble in mineral acids. Its most naturally occurring form, with a monoclinic crystalline structure, is the mineral baddeleyite. The dopant stabilized cubic structured zirconia, which is synthesized in various colors, is mainly used as a gemstone and a diamond simulant.

The zirconium oxide industry concentration is relatively high; there are not so many manufacturers in the world. The giant manufacturers mainly distribute in American and Europe. American has a long history and unshakable status in this industry, such as Zircoa, has perfect products. As to France, the Imerys has become a global leader. In Japan, it is Showa Denko that leads the technology development. In China, the manufacturers focus in Anhui, Fujian and Henan province.

Since the COVID-19 virus outbreak in December 2019, the disease has spread to almost 100 countries around the globe with the World Health Organization declaring it a public health emergency.
