Abstracts

The Intrauterine Device (IUD) is one of the most widely used, reversible contraceptive methods in the world. Modern IUDs are a safe, highly effective and cost-effective method of contraceptive. However, IUD uptake varies significantly across the Asian Countries. Sri Lanka has the highest IUD prevalence whereas Japan has the lowest IUD prevalence among the Asian countries. South Korean government is discouraging the IUD uses, whereas India is promoting. India is expected to have the highest market share in IUD market in Asia in 2019. Indonesia has the second highest IUD users share in Asia for the year 2014.
