Abstracts

Asia Condom Market Analysis

Condoms are the third most popular contraceptive method in Asia. China is the largest user of male condoms followed by India and Japan in second and third position in Asia. China has the highest user base due to its large population base. However in terms of prevalence, it is particularly favored in three more-developed Asian countries — Japan, South Korea and Singapore — where condom use ranges from 22% to 42% of those using contraception. The average fertility rate of these three countries is around 1.3, the lowest across Asia, which partially stem from the popularity of condoms in these countries.

At present Condoms market in Asia is close to US\$ 4 Billion and growing year on year. Unlike China here Japan leads the race and controls the highest market share. China and India stands at second and third spot respectively.

The report titled 'Asia Male Condom Users, Market Analysis & Forecast' provides a comprehensive analysis of the Asia Male Condom market covering in detail various aspects such as male condom users, male condom market, and market share of the male condom users & male condom market.

This 97 page report with 44 Figures and 5 Tables provides a complete analysis of top 10 Asian countries in male condom users & market. All the 10 countries in the report have been studied from 2 viewpoints.

- I. Male Condom Users from the year 2004 – 2020
