Abstracts

Globally, Cardiovascular diseases are the leading cause of mortality. According to the World Health Organisation, nearly 17.9 million global deaths occur due to Cardiovascular disease every year. According to the American Heart Association (AHA), more than 800 Thousand individuals die from cardiovascular diseases in the United States each year and nearly 92.1 million Americans are living with some form of cardiovascular disease. A cardiac arrhythmia is a condition where the person heartbeat is irregular, i.e., either, too slow, or too fast. Cardiac arrhythmia monitoring devices help in monitoring the patients who are at risk with heart arrhythmia. According to Renu Research Analysis, Global Cardiac Arrhythmia Market will be US\$ 7.9 Billion by 2026.

What is Cardiac Arrhythmia and How Monitoring Device Helps?

People with cardiovascular diseases have increased risk of cardiac arrhythmia condition like tachycardia and bradycardia that need continuous monitoring to overcome sudden heart failure. When a heart rate is above 100 beats per minute in adults that it is called "tachycardia". And when the heart rate of an adult is below 60 beats per minute than it is called "bradycardia".

The cardiac arrhythmia monitoring device can monitor or record the electrical activity of the heart. These devices help in identifying the type and the cause of irregular heart rhythms. These devices help in continuously monitor the patients suffering from cardiac arrhythmia through remote patient monitoring.

Factors Driving the Cardiac Arrhythmia Market

Growth of telemedicine and the popularity of smartphone technology has changed the landscape of cardiac monitoring devices. Besides, key players operating in the market are competing based on advanced and connected cardiac arrhythmia monitoring devices which is expected to propel the growth of this market in upcoming years.

The driving force, which is boosting the global Cardiac Arrhythmia Market, is surging cases of lifestyle habits say obesity, smoking, excessive alcohol consumption. Some of the other factors include rising healthcare expenditure, rising consumption of tobacco and alcohol, accelerating economic growth, growing obese population.

Renub Research report titled "Global Cardiac Arrhythmia Market by Segment (Implantable Cardiac Monitoring Devices, ECG Testing Device, Mobile Cardiac Telemetry Monitors and Event Recorder), Region (North America (United States and Canada), Latin America, Europe, Asia Pacific and Rest of the World), End-User (Hospitals, Clinics & Cardiac Centers, Ambulatory Surgery Centers and Other End User) Key Players (Abbott Laboratories, GE Healthcare, Medtronic PLC, Koninklijke Philips NV, Biotelemetry, Inc.)" This report provides an all-encompassing analysis on the Global cardiac arrhythmia market

Segments – This report covers Market from 4 Viewpoints

Implantable Cardiac Monitoring Devices

ECG Testing Device

Mobile Cardiac Telemetry Monitors

Event Recorder

End – Users – Market breakup from 3 Viewpoints

Hospitals, Clinics & Cardiac Centers

Ambulatory Surgery Centers

Other End-User

Regions – Market breakup from all the 5 Regions

North America

United States

Canada

Latin America

Europe

Asia Pacific (APAC)

Rest of the World

All the key players have been covered from 3 Viewpoints

Overview

Recent Developments
