Abstracts

Globally during the past few years, the dental implant market has undergone a transformational change, attributed to its low-cost competitors and rising consolidations. The dental implant is defined as an artificial tooth or tooth root, which is surgically implanted into upper or lower jawbones. The dental implant offers an alternative option to people who lost their tooth or teeth due to periodontal disease, an injury, or some other reason. As per our research report, Global Dental Implant Market is projected to be US\$ 8.5 Billion by 2026.

Technological advancement in design and material used in surgery is also one reason for dental implant popularity. Titanium, the material is most widely used by the doctor to make the dental implant. The high biocompatibility, strength, rigidity, and greater strain-bearing capacity are the main factor for using titanium. Structurally, dental implant designs are tapered or parallel walled nowadays. The most preferred type of implants is tapered because of its wide variety and more stability than parallel-walled dental implants.

According to Renub Research, Dental Implant Industry is expected to grow with double-digit CAGR of 12.47% from 2020 to 2026. Growth factors that will boost the dental industry in future are as follows.

Around the globe, growing demands for better oral hygiene services

The rising disposable income.

Patient's awareness of prosthetic teeth implant

Growth in age-related diseases,

Increasing application of CAD/CAM technologies

The rise in applications of dental implants in various therapeutic areas

The rise in the number of people willing to adopt dental cosmetic surgery

However, high-priced treatment is one of the significant challenges faced by the Dental implant market. Patients prefer to do dental implants in clinics due to its lower cost as compared to hospitals.

COVID-19 Impact on this Industry

The outbreak of covid-19 pandemic has negatively impacted the growth as a dental procedure involves very close contact between the patients and the dentists. In dental procedures, water spray for cleaning and other operations may cause the droplets in the air or into the instruments resulting transmission of the virus. Due to such risks, government and regulatory bodies worldwide have discouraged the dentistry for a few months in 2020. For the year 2020, Worldwide Dental Implant Market was valued at US\$ 4.2 Billion 2020

Renub Research report titled “Global Dental Implant Market, by Materials (Titanium, Zirconium and others), Structure (Tapered Implants and Parallel Walled Implant), End-User (Hospitals, Dental Clinics and Others), Regions (North America (United States and Rest of North America), European Union 7, Asia Pacific (Australia, China, India, Japan, South Korea), Latin America, Middle East (Saudi Arabia, United Arab Emirates & Rest of Middle East) and Africa , Company (Danaher Corporation, Dentsply Sirona, Patterson Companies Inc., Henry Schein, & Zimmer Holdings Inc.) Strategy, Sales & Forecast” provides an all-encompassing analysis on the Global Dental Implant Market.

Materials - Market breakup from 3 viewpoints

Titanium

Zirconium

Others

Structure - Market breakup from 2 viewpoints

Tapered Implants

Parallel Walled Implants

End-User – Market breakup from 3 viewpoints

Hospitals

Dental Clinics

Others

Region - Market breakup from 6 viewpoints

1. North America

2. Europe

3. Asia Pacific

4. Middle East

5. Latin America

6. Africa

North America – Market breakup from 2 viewpoints

United States

Rest of North America

Europe – Market breakup from 7 Countries

1. Germany

2. United Kingdom

3. France

4. Spain

5. Italy

6. Russia

7. Others

Asia Pacific – Market breakup from 5 Countries

1. Australia
2. China
3. India
4. Japan
5. South Korea

Middle East – Market breakup from 3 Countries

1. Saudi Arabia
2. United Arab Emirates
3. Rest of Middle East
