Abstracts

Drug of Abuse Testing Market will be more than US\$ 4.8 Billion opportunity by the end of year 2024. The market will grow due to growing drug users, raising use of drug of abuse testing in the companies, growth in cocaine uses and increase in government and non-government institutions initiatives globally. During 2006 to 2015, global drug user's growth has grown nearly 23 percent. Opioids are one of the most dangerous drug type. Miss-use of pharmaceutical opioids has increased opioids related mortality in United States. United States is the leading country for opioids drug related deaths globally.

Drug trafficking, mainly the cocaine and synthetic drugs are one of the driving forces for this market place as it has slowly but steadily crossing the countries boundaries and geographical regions. For the first time in 2015, methamphetamine intercepted quantity in East and South-East Asia is higher than North American region. Drug of abuse

testing is a method to detect drug addict person. It can perform by various methods such as urine testing, blood testing, oral testing and hair testing.
