Endovascular Aneurysm Repair Market is expected to surpass US\$ 3.8 Billion by the end of year 2024. Endovascular aneurysm repair (or endovascular aortic repair) (EVAR) is a type of endovascular surgery used to treat pathology of the aorta. In this medical procedure Stent graft is placed inside an Aorta without removing any tissue from patients Aorta as it's required in open aortic surgery. Endovascular Aneurysm Repair is more popular than open-abdominal surgery as its less invasive and patient recovery time is faster. In Endovascular Aneurysm Repair Stent graft is used in three types Abdominal Aortic Aneurysm (AAA), Thoracic Aortic Aneurysm (TAA), Thoracoabdominal Aortic Aneurysm (TAAA). This report exclusively covers endovascular aneurysm repair via different products of stent graft.

The main factors that reinforce stent graft market growth are increasing prevalence of cardiac diseases & Hyper Tension, Growing Geriatric population, unhealthy lifestyle, alcohol consumption and smoking. High Medical Cost, Lack of reimbursement policies and increasing out of pocket expenditure can hinder the market growth of Endovascular Aneurysm Repair Market.
