Abstracts

Self-Monitoring Blood Glucose (SMBG) device market is providing big business opportunities for device manufactures in the Europe. It is projected that Europe Blood Glucose Device market will climb to nearly US\$ 8 Billion landmark by the end of 2024. Driving factors which help to reach this market are increasing diabetic population in the European countries, Governments and NGOs efforts to increase awareness, increasing per capita healthcare expenditure and availability of reimbursements in most of the European countries.

Diabetes is a condition in which blood sugar level is abnormal; either it is high or low of given standard. It is two types - Type 1 and Type 2. In Type 1 diabetes, body does not make insulin whereas in Type 2, body makes irregular insulin sometimes high and sometimes low which is not good for human body. In European region, diabetic mellitus population is steadily rising in United Kingdom, Spain, Netherlands and Norway countries.

Europe Blood Glucose Device Market, Forecast SMBG Components (Test Strips, Lancet, Meter), Diabetes Population (Type 1 & 2) published by Renub Research studies the European Countries Blood Glucose Device Segments Market: Blood Glucose Test Strips Market, Blood Glucose Lancet Market and Blood Glucose Meter Market. Annual forecast are provided for the period of 2018 through 2024. A Seven year historic analysis is also provided for these markets.
