## **Abstracts**

The space-saving folding furniture has become very popular in recent years. With the fast-paced urbanization, the industrial revolution the demand for millions of single- and two-person households has been increasing globally, resulting in the demand for small and portable furniture. The foldable furniture includes Beds, Tables, Sofas and most importantly, the chairs. Folding chairs and tables only take up space when they are needed and can be stored in a closet when they are not in use. A combination of the portable, lightweight and easily storable qualities has created an appeal among the general population. According to Renub Research report, the Global Folding Furniture Market will be US\$ 15.3 Billion by 2027.

The global folding table furniture market is growing in the product segment along with Sofa and other folding furniture. By distribution channel, online folding furniture becoming fast-growing channel compare to the offline distribution channel. Offline folding furniture stores are extremely concentrated but, the competition is rising. North America and the Asia Pacific are leading in the global folding furniture market but countries such as Europe, Middle East & Africa and South America are not far behind. For instance, Flash Furniture in the USA offers bamboo wood folding chairs which can be used indoor as well as in the outdoor environment.

Technological advancements are helping furniture giants to offer customers the convenience to address their day to day needs. Moreover, rising demand for studio apartments in developed countries such as the US and the UK has also increased the adoption of folding furniture. The Covid-19 has impacted the manufacturing and supply

chain management of folding furniture market globally.
