Global Robotics Market is likely to cross US\$ 130 Billion by the end of 2024. This report segmented the Global Robotics market in two categories

- 1) Industrial Robotics Market
- 2) Service Robotics Market

Industrial robots are deployed in the manufacturing and production processes to perform varieties of industry related work. Service robots assist human beings, typically by performing a job that is boring, secluded, or repetitive, including household chores. A new market research report published by Renub Research studies the comprehensive insight and in-depth analysis of the Global Robotics Market as title Global Robotics Market, Volume & Forecast by Type (Automotive, Electrical & Electronics, Metal, Chemical, Rubber and Plastics, Food, Defense, Agriculture, Logistics, Medical, Construction, Mobile Platform, Inspection, Underwater, Rescue and Security).

Global Robotics Market is also driven by big funding made by defense sector all around the globe to develop military drones for surveillance, unnamed aerial devices and, bombing and image capturing application. Nowadays, demand of robots has improved immensely as growing trends are heading for automation and constant pioneering technical advancements in industrial robotics and service robotics. By the end of projected time frame, the global service robotics will surpass and stand parallel to global industrial robotics market.

In 2017, Global Robotics Volume counted for more than 400,000 Units. In Industrial Robotics electrical & electronics segment is expected to capture close to half of the volume share by the end of projected time frame of 2024. The top three segments in Service Robotics sector are Defence Robotics, Medical Robotics, and Logistic Robotics. Global service robotics volumes will grow exponentially propelled by exceptional demand of mobile platform robots and logistic robots.
