Abstracts

Japan is a nation where private educational organizations are widespread. Japan has a unique private school setup. The growth of private educational organizations at the various educational stages is highly distinct. The percentage of learners enrolling in private educational organizations is exceptionally large at both pre-school and higher education levels. A high-end nursery or personal class can cost US\$ 1,000 a month readily, more than three times the average. In 2017, 77,453 students across Japan were registered in private primary schools, up 15% from 2000. Japan Private School Market is expected to be more than US\$ 52 Billion by the end of the year 2025.

The primary reasons for growth are that as most of the children's mothers are working, and, the nation is experiencing a decrease in the birth rate. So, having only one or two children frees up money for many couples to invest more in premium education, which they hope will put their children on a path to the top schools of the nation. While getting into schools, in particular, may be simpler for younger generations, but more candidates may end up attempting to fit in the best.

Renub Research report titled "Japan Private School Market, Type, Revenue & Enrollment (Kindergartens, Elementary School, Lower Secondary Schools, Upper Secondary Schools, School for Special Needs, Others (Crams Schools or Juku, Miscellaneous Schools), Regions (Tokyo, Yokohama, Osaka, Nagoya, Saporro, Others), Schools (New International School of Japan, Kanto International Senior High School, Keika Gakuen, International School of the Sacred Heart, Tokyo International School, Nishimachi International School)" provides a complete analysis of Japan Private School Market.
