Abstracts

Japan smart home market is predicted to be US\$ 5 Billion by 2024, expanding at double digit CAGR. Government initiatives for infrastructure support, establishing common ECHONET Standard which supports HEMS devices and smart home policies are some of the major driving factors for the expansion of Japanese smart homes market.

Robust Urbanized Populace will enhance Japan Smart Homes Market

Japan is known as land of mountains which covers almost two third of the total land. Therefore, rest landmass is used to build house for the Japanese population. More than 90 percent of total population in Japan lives in cities, which provides the opportunities for the varieties of players such as consumer electronics manufacturers, house builders, housing equipment maker and communication manufacturers.

Japanese Government has set Common Standards for Smart Home Devices

For smart home equipments, the government of Japan has built common standards, for key players who assisted in the rapid expansion of this industry. Since we know that other Asian countries have no common standards and because of the lack of common standard, numerous consumers' electronic manufactures and housing equipment maker have made their devices on various standards which have created integration issues. Accordingly, the Japanese government has established a common ECHONET Standard in February 2012.

In 2016, around 60% of market share is controlled by Home Automation & Energy Management

Japan smart home market has been categorized in 5 segments: Home Entertainment, Ambient Assisted Living (AAL), Energy Management, Home Security and Home Automation. Home Automation and energy management has the collective market share of over 60 percent in 2016. Energy management is the primary focus area for the Japanese government since 2011 earthquake and home automation devices are helping to assist the ageing population in various ways.
