Abstracts

Modified Starch Market will reach more than US\$ 13 Billion by the end of year 2024. On the basis of raw materials the modified starch market is categorized as Corn, Wheat, Cassava and Potato. The modified starches are used in all starch applications likewise emulsifier, binder, thickening agent, and stabilizer in food and on-food industries. Besides, the modified starch market is also categorized on the basis of its application in numerous industries like Confectionery and Drinks, Processed food, Corrugating and Paper Making, Feed, Pharmaceuticals and Chemicals and other non-food. Modified starch is widely used in confectionery, bakery and dairy products to enhance their texture and stability and in pharmaceutical industry; it is used in the formulation of tablets.

Regional Aspects: America has the Highest Production Share

On the basis of regions, the modified starch market has been segmented into Americas, Europe, Asia-Pacific and Rest of World. The modified starch market is mostly dominated by Americas and Asia-Pacific. While on the basis of production, Americas is having the maximum production share among all the regions studied in this report.

Market Key Players: Modified Starch

Some of the key players in the global modified starch market include Cargill, Ingredion, Tate & Lyle, Archer Daniels Midland Company, Riddhi Siddhi Gluco Biols Ltd. and Gulshan Polyols Ltd.

The report caters key statistics on the market status of the Modified Starch manufacturers and fitting source of assistance for companies and direction and individuals interested in the industry. According to the report, it gives details of the market and production trends, company profile, the key growth drivers and restraining factors, and their projections for the upcoming years. The report unfolds the total global market of Modified Starch industry including production, production value, capacity, cost/profit, and demand/ supply. Generally, market is segmented by application, by company, and by region for the viable landscape analysis.

Furthermore, the report forecasts 2017-2024 market expansion trends of Modified Starch industry as well as studies the ensuing demand, ambitious raw materials, and current market dynamics is also carried out. At present, modified starch is being widely used as one of the major ingredients in several industries including chemicals, pharmaceuticals, food and non-food, paper, textile, beverages and, which has the potential to augment its market in the recent years.

Renub Research report “Modified Starch Market, Production & Forecast, Sectors (Corn, Wheat, Cassava, Potato), Regions (Americas, Europe, Asia Pacific, ROW), Segments (Confectionery & Drinks, Processed Food, Corrugating & Paper Making, Feed, Pharmaceuticals & Chemicals, Non-food), Company Analysis” with 180 Pages and 153 Figures covers in-depth analysis of the Modified Starch industry with a focus on the global market.

The report have been analyzed from 2 major viewpoints and further studied by 2 different perspectives.
