Abstracts

Neonatal Intensive Care Unit is also known as specialized nurseries. The neonatal intensive care unit is for premature babies or baby with high complication, because it is very specialized or advanced equipped unit that has expert medical staff and professional. All the clinics or hospitals or main health centers (PHC) of developed countries have their own in-house neonatal care unit. In order to reduce their preterm mortality rate government of Latin American, Asia and Africa are constructing more neonatal intensive care units in their country. Global Neonatal Intensive Care Market is expected to reach US\$ 9 Billion market by the end of year 2025.

The prime factors that are fueling the market growth are; rising premature birth, rising complication during the birth, rising number of death (new born baby), improving healthcare infrastructure, increasing healthcare expenditure, rising per capita expenditure etc. Rising number of infection or disease of premature newborns are other factors which will further propel the market in coming future.
