Abstracts

Transcatheter heart valve market is anticipated to reach nearly US\$ 7 Billion by 2024. This report covers market dynamics and competitive analysis of leading industry players. Transcatheter heart valve is the latest technology that has varieties of advantages over traditional surgical procedure. It is less invasive, simple procedure and has less mortality rate over conventional surgical methods. Transcatheter mitral valve replacement is very recent technology and it is gaining prominence since its getting fast approvals from various governments globally. The replacement of mitral heart valve is quite complex procedure due to its complex structure and position. So Transcatheter Mitral Heart Valve is creating a big market by replacing the traditional technique to change mitral valve.

Rising ageing population and prevalence of heart valve disease is major growth drivers for Transcatheter Heart Valve market. In addition people mostly prefer less invasive technique, so adoption of Transcatheter Heart Valve rapid pace of growth will further boost the market. High cost of Transcatheter Heart Valve and several risk associated with procedure will hinder the market growth.

Renub Research latest study report “Transcatheter Heart Valve Replacement Market, Patient Numbers, by Position (Transcatheter Mitral Valve Replacement and Transcatheter Aortic Valve Replacement), Heart Valve Type (Mechanical & Tissue Heart) Countries (United States, Germany, China, France, Italy, Japan, Spain, United Kingdom, India and Brazil) Companies (Edward lifeScience Corporation, Boston Scientific Corporation, St Jude Medical Inc., Medtronic Inc)” provides a detailed and comprehensive insight of the Transcatheter Heart Valve Market.
