Abstracts

United Kingdom (UK) Proton Therapy Market, Reimbursement Policy, Patients Treated at Proton Facility & Forecast is a research study published Renub Research. UK Proton Therapy Market is expected to grow with a CAGR of 82% in future. United Kingdom Proton Therapy Market is expected to grow 10 times from its current market in 2016. Currently UK has only one Proton Therapy facility, at Clatterbridge cancer center and it's a 'low-energy' machine, only suitable for treating people with rare eye cancers. Treating more complex cancers requires a 'high-energy' beam, so the NHS covers the cost of sending patients for treatment overseas (in the US or Switzerland) when there's clear evidence that proton beam therapy is the best option. However this scenario is expected to make a drastic change in the next few years as United Kingdom will have at least 6 Proton Therapy Centers.

The report provides a comprehensive assessment of the fast-evolving, high-growth of Proton Therapy Market. In this report we have studied the market in two parts a) Actual Market and b) Untapped Market. The report also talks about list of all Operational and about to be opened Proton Therapy Facility; Proton Therapy Reimbursement Policies in United Kingdom. Proton Therapy revenues from 3 companies (IBA, Varian Medical Systems, Elekta) has also been studied in the report.

a) Actual Market is the current market which is already present

b) Untapped Market is the market which can be achieved; but it has yet not been achieved due to demand and supply gap. At present only a few proton therapy centers are available that can treat a limited number of patients each year.
