Abstracts

United States Biopsy Market will cross US\$ 17 Billion by the year 2024 owing to the rising prevalence of cancer in the region. According to the World Health Organization, cancer cases are expected to surge 57% worldwide in the next 20 years. Biopsies are most often done to look for cancer; a biopsy is a sample of tissue taken from the body in order to examine it more closely. Further, growing patient awareness and the advancement in the biopsy techniques are also expected to fuel future growth of biopsy market in United States.

The World Cancer Report, produced by the WHO's specialized cancer agency and released on World Cancer Day, predicts new cancer cases will rise from an estimated 14 million annually in 2012 to 22 million within two decades. Over the same period, cancer deaths are predicted to rise from 8.2 million a year to 13 million.

By Segment – United States Biopsy Market and Volume

On segment basis, Breast cancer biopsies accounts for the highest share in the United States Biopsy Market for the year 2017. While, in terms of Volume, Breast cancer biopsy has second highest share. Further, the report also covers the market aspects of Liver, Lung and Thyroid cancer biopsies. The United States Biopsy Market and Volume will experience a major growth during the forecast period owing to the increasing

number of biopsy procedures and rising demand for minimally invasive procedures

All the 8 companies studied in the report have been studied from 4 points
