Abstracts

Study shows that, approximately 15 million populations are affected by food allergy in the United States mostly are children. Food allergy is a type of adverse food reaction which is relating to immune system. The body produces allergic or immunoglobulin E (IgE), antibody to a food. According to Renub Research United States Food Allergen Testing market will be more than US\$ 3.8 Billion opportunities by 2024.

Although, there are more than 160 food items can cause food allergies, but Food Allergen Labeling and Consumer Protection Act (FALCPA) have recognized 8 foods that account for 90 percent of food allergic reactions. These foods are as follows: peanuts, wheat, milk, eggs, crustacean shellfish (lobster, shrimp, crab), fish (flounder, bass, cod), tree nuts (walnuts, almonds, pecans) and soybeans. All these 8 foods are also called "Major Food Allergens" Food and Drug Administration (FDA), USDA's Food Safety and Inspection Services (FSIS) both these organizations have laws which

require all the ingredients in food product be listed on the food label.

The factors that are driving the United States Food Allergen Testing market are the rising allergic reactions among consumers, implementation of tough food safety regulations, and international trade of food materials.

A new report by Renub Research studies, the “United States Food Allergen Testing Market, Food Sources (Peanuts, Milk & Egg, and Sea Foods) by Treatment & Services (Immunology Services, Allergen Immunotherapy, Venipunctures, Office or O.P. Services New Patient, Ingestion Challenge Testing, Rest, Office or O.P. Services Established Patient, Allergy Testing, Chemistry Tests, Enteral Formulae & Supplies, Office or Other O.P. Consults, Pulmonary Diagnostic Testing and Therapies), Age Groups (0-3 years to Over 60 years) Types (Urban & Rural) Patient Numbers”.

Peanuts Allergen has the Highest Market Share

The report covers the market allergen market of Peanuts, Milk & Eggs and Sea foods.

Urban areas populations are mostly affected by food allergen

The report covers the Urban and Rural patient numbers and market of Food Allergy Testing.

Treatment & Service – Food Allergen Test Market

Immunology Services

Allergen Immunotherapy

Venipunctures

Office or O.P. Services New Patient

Ingestion Challenge Testing

Rest

Office or O.P. Services Established Patient

Allergy Testing

Chemistry Tests

Enteral Formulae & Supplies

Office or Other O.P. Consults

Pulmonary Diagnostic Testing and Therapies

Food Sources – Food Allergen Test Market

Egg & Milk
