Abstracts

Off-label prescribing of medicines is prevalent worldwide because it gives freedom to physicians to apply new therapeutic options based on the latest evidence. Although physicians may lawfully prescribe approved Drugs for any use consistent with available scientific data and proper medical practice, but unfortunately, this is done without adequate scientific data. Often, when the best available therapeutic option fails, patients demand new approach or new treatment which ultimately leads to off-label uses.

Off-label use is very common in United States. United States Off-label Drugs demand has grown at a fast pace in the past decade and likely to grow in the forecasting period. It is likely that United States off-label market will cross the figure of 60 Billion by the year 2020. Central Nervous System (CNS) and Cancer off-label Drugs controls the largest market share of the total US off-label Drugs market. Anti-Infectives Off-Label Drugs Market and Anti-Ashmatics Off-Label Drugs together are expected to control close to 35% market share by 2020.
