China's equity investment has developed much rapidly in the past several years. In 2002, China's total equity investment was only US\$534 million, but it already reached US\$2.18 billion in 2006.

From January to September of 2007, the investment of the private equity fund in Mainland China was on the upward trend. The accumulative number of companies, in which investment was made, reached 126 and the accumulative value of the investment totaled US\$8.37 billion, up 3.3% compared with the same period of previous year.

47 private equity funds completed their fundraising in the first three quarters of 2007, up 74% year on year. The total amount was US\$23.05 billion, 3.36 times the figure in the same period of the previous year.

In the first three quarters of 2007, 34 companies invested by private equity funds and venture capital firms completed their initial public offering or IPO and raised US\$6.3 billion.

ResearchInChina collected ten typical cases of China equity investment in 2007 based on the investment amount.

According to the research on the cases and the authoritative statistics issued by the listed companies and institutions, the report analyzes the status quo, the policy environment, the investment cases and the key enterprises' development of China equity investment industry in 2007. It makes a detailed summary of 25 active equity investment companies in China and their investment cases. Furthermore, the report also forecasts the developing trend of the industry in 2008 by analyzing the development situation of China equity investment in 2007 and before 2007.
