

Global and China Electric Vehicle (BEV, PHEV) Industry Report, 2019-2025

<https://marketpublishers.com/r/G48EE49D0FEEN.html>

Date: June 2019

Pages: 180

Price: US\$ 2,800.00 (Single User License)

ID: G48EE49D0FEEN

Abstracts

As per current cost, the market will be at a tipping point in 2022 when a battery electric vehicle will have almost the same cost as a fuel vehicle, which means electric vehicle can be selected on an equal footing, and when electric vehicles will see an expanding share of the automotive market.

In 2018, 2 million electric vehicles were sold worldwide, and the sales figure will surge to 4 million units in 2020, 12 million units in 2025 and 21 million units in 2030 with the cuts in production costs.

By 2030, battery electric vehicles will account for 70% of electric vehicles. Amid the burgeoning sales of electric vehicles, the sales volume of fuel vehicles will stabilize, and start to take a nosedive from 2024.

Policies will serve as a stimulus for the electric vehicle industry in a long period of time, and the fuel economy and emission standards of the world's major automotive markets have been finalized. To be in line with these mandatory measures (for example, the EU vehicle carbon dioxide emission goal), the electric vehicle market will evolve fleetly. Plug-in hybrid and battery electric vehicles will make up 10% of the global vehicle sales volume by 2025, and 22% by 2030, of which battery electric vehicles will command more than half of the total EV sales.

As the US and European governments vigorously promote the development of electric vehicle technology, China will become the main battlefield for EV makers in the next two decades. Up to date, China's electric vehicle industry has passed through incubation, and the Chinese government is downsizing subsidies for EV purchase and will completely terminate the subsidy in 2020. The demand may be somewhat suppressed

in the next two years, but then it will resume strong growth with the advent of the era of economical electric vehicles. In 2025, China's EV sales will reach 5 million units, a 20% share of China's automobile sales. By 2040, China's EV sales will occupy 68% of the global automobile sales.

At present, battery energy density and safety are still the primary factors restricting the development of electric vehicles. Nowadays, common electric vehicle on the market only has the mileage endurance of 300-500 km, which will be raised in the next eight to ten years thanks to constantly updated new technology for power batteries during 2020-2030, such as lithium air, alternative metal ion chemicals, solid state battery technology and high energy capacitors.

In terms of charging technology, the next-generation 800V battery electric vehicle will feature a longer recharge mileage and a shorter charging time. The 240-400KW ultra-high-speed charging piles will greatly shorten the charging time.

Global and China Electric Vehicle (BEV, PHEV) Industry Report, 2019-2025 by ResearchInChina focuses on the following:

- Major policies about electric vehicle industry in China;

- Sales volume of electric vehicles, competitive pattern and development trend worldwide;

- Sales volume of electric vehicles, competitive pattern and development trend in China;

- Production and sale and competitive landscape of electric vehicle market segments in China, involving electric passenger vehicle (BEV, PHEV), electric bus (BEV, PHEV), and electric logistics vehicle;

- Electric vehicle industry chain in China, covering charging pile, battery, motor, inverter, and IGBT;

- Status quo, production bases, capacity, planning for vehicle models, development strategies, etc. of key Chinese electric vehicle manufacturers.

Contents

1. OVERVIEW OF ELECTRIC VEHICLE INDUSTRY

1.1 Introduction and Classification of Electric Vehicles

1.1.1 Introduction

1.1.2 Classification

1.1.3 Technology Roadmap

1.2 Industry Chain

2. POLICY ENVIRONMENT FOR ELECTRIC VEHICLE INDUSTRY

2.1 Fiscal Subsidy Policy

2.1.1 Subsidies for Electric Passenger Car

2.1.2 Subsidies for Electric Bus

2.1.3 Subsidies for Electric Truck/Logistics Vehicle

2.1.4 Subsidies for Fuel Cell Bus

2.2 Catalogue for the Recommended Models of New Energy Vehicle Popularization and Application (New Edition)

2.3 Battery Recycling Technology Policy

2.4 Preferential Tax Policy

2.5 Production License Policy

3. ELECTRIC VEHICLE MARKET

3.1 Global Market

3.1.1 Overview

3.1.2 Europe

3.1.3 The United States

3.2 China

3.2.1 Output

3.2.2 Sales Volume

3.2.3 Competitive Landscape

3.2.4 Market Structure

3.2.5 Import Market

4. CHINESE ELECTRIC PASSENGER CAR MARKET

4.1 Output

- 4.2 Sales Volume
- 4.3 Competitive Landscape
- 4.4 Enterprise Layout

5. CHINESE ELECTRIC COMMERCIAL VEHICLE MARKET

- 5.1 Overview
- 5.2 Electric Bus
- 5.3 Electric Truck

6. MAJOR ELECTRIC VEHICLE MANUFACTURERS IN CHINA

- 6.1 SAIC Motor Corporation
 - 6.1.1 Profile
 - 6.1.2 Operation
 - 6.1.3 EV Output and Sales
 - 6.1.4 Development Strategy
 - 6.1.5 Model Planning
 - 6.1.6 Industry Chain Layout
- 6.2 FAW Group
 - 6.2.1 Profile
 - 6.2.2 Operation
 - 6.2.3 EV Products
 - 6.2.4 EV Development Strategy
- 6.3 Dongfeng Motor Corporation
 - 6.3.1 Profile
 - 6.3.2 Operation
 - 6.3.3 EV Output and Sales
 - 6.3.4 EV Development Strategy
- 6.4 BYD
 - 6.4.1 Profile
 - 6.4.2 Operation
 - 6.4.3 EV Output and Sales
 - 6.4.4 Model Planning
 - 6.4.5 Strategic Layout
 - 6.4.6 Overseas Market
 - 6.4.7 DENZA
- 6.5 Chang'an Automobile
 - 6.5.1 Profile

- 6.5.2 Operation
- 6.5.3 EV Products
- 6.5.4 Model Planning
- 6.5.5 Production Bases
- 6.5.6 EV Development Strategy
- 6.6 Chery
 - 6.6.1 Profile
 - 6.6.2 Operation
 - 6.6.3 EV Output and Sales
 - 6.6.4 Major Projects
 - 6.6.5 Model Planning
 - 6.6.6 Yiqi Taixing Automotive Technology Service Co., Ltd.
 - 6.6.7 EV Development Strategy
- 6.7 Geely
 - 6.7.1 Profile
 - 6.7.2 Operation
 - 6.7.3 EV Output
 - 6.7.4 Joint Ventures
 - 6.7.5 EV Development Strategy
- 6.8 BAIC Group
 - 6.8.1 Profile
 - 6.8.2 Operation
 - 6.8.3 EV Output and Sales
 - 6.8.4 Production Bases
 - 6.8.5 Joint Ventures
 - 6.8.6 Model Planning
 - 6.8.7 Development Strategy
 - 6.8.8 Cooperation with Shandong Baoya New Energy Vehicle Co., Ltd.
- 6.9 GAC
 - 6.9.1 Profile
 - 6.9.2 Operation
 - 6.9.3 EV Products
 - 6.9.4 Sales Objective
 - 6.9.5 Technology Roadmap
 - 6.9.6 EV Development Strategy
 - 6.9.7 Cooperation with UBER
- 6.10 Brilliance Auto
 - 6.10.1 Profile
 - 6.10.2 Operation

- 6.10.3 EV Output and Sales
- 6.10.4 EV Development Strategy
- 6.10.5 Cooperation with Neusoft
- 6.11 Great Wall Motor
 - 6.11.1 Profile
 - 6.11.2 Operation
 - 6.11.3 EV Products
 - 6.11.4 EV Development Strategy
 - 6.11.5 Wireless Charging System
 - 6.11.6 Major Projects
- 6.12 JAC
 - 6.12.1 Profile
 - 6.12.2 Operation
 - 6.12.3 EV Products
 - 6.12.4 Major Projects
 - 6.12.5 EV Development Strategy
- 6.13 Zotye
 - 6.13.1 Profile
 - 6.13.2 EV Sales
 - 6.13.3 EV Development Strategy

7. ELECTRIC VEHICLE INDUSTRY CHAIN

- 7.1 Infrastructure
 - 7.1.1 Number of Charging Stations and Piles
 - 7.1.2 Construction in Major Cities
 - 7.1.3 Development Planning
 - 7.1.4 Charging Equipment Suppliers
- 7.2 Key Components
 - 7.2.1 Battery
 - 7.2.2 Motor
 - 7.2.3 Inverter
 - 7.2.4 IGBT

8. MARKET SUMMARY AND FORECAST

- 8.1 Market Forecast
 - 8.1.1 Overall Market
 - 8.1.2 Market Segments

8.1.3 Competitive Pattern

8.2 Summary of Enterprises

8.2.1 Production Layout of Major Enterprises

8.2.2 Plans of Major Enterprises

8.2.3 Models to Be Launched in 2019

I would like to order

Product name: Global and China Electric Vehicle (BEV, PHEV) Industry Report, 2019-2025

Product link: <https://marketpublishers.com/r/G48EE49D0FEEN.html>

Price: US\$ 2,800.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/G48EE49D0FEEN.html>
