Abstracts

Global and China LED Industry Report, 2014-2015 is primarily concerned with the following:

1. LED development trend
2. LED industry analysis
3. 38 LED companies

After experiencing fall to the bottom and price slump in LED during 2012-2013, quite a few LED enterprises have been forced to go bankrupt or retreat from the industry. However, those that still struggled on the manufacturing front have reduced their capacity. Even worse, so many companies have aborted their capacity expansion plans, which is particularly true of the upstream sectors. Price reduction stimulates the market and capacity cuts stabilizes the price. Therefore, the LED industry improved greatly in the first half of 2014, which soon came to an end. The market rise propelled enterprises to operate in full capacity, and even the enterprises that had been closed down resumed their capacity. But in the second half of 2014, the LED market plummeted and will very likely continue to worsen in 2015.

The LED lighting market seems to have broad prospects, but the industry's threshold is extremely low, especially in downstream sectors of LED lighting, which virtually have no financial and technical thresholds. Price competition prevails in this market. On the other hand, there are a great number of enterprises in the downstream sectors of LED lighting industry that they, to open the market, have to invest capital into marketing. Although LED lighting market looks good, the profit, particularly operating income, shows declining trend. Take example for Cree, a large US company, whose operating margin in Q4 2014 was only 2.5% in sharp contrast to 8.5% in Q4 2013.

In October 2014, Samsung announced that it would retreat from overseas LED lighting

market and shift its focus to the market in South Korea. In addition, GE repositioned its lighting business and is very likely to spin off the lighting business. Toshiba also largely withdrew from the overseas LED lighting market.

In July 2014, Philips merged LED Chip business and automotive lighting business into a new company, while other businesses were integrated to form Philips Lighting. In future, Philips will sell the equities of Philips Lighting, and the highly profitable LED Chip and automotive lighting businesses will still be Philips' wholly-owned subsidiary.

NICHIA's YAG is generally recognized as white-light LED patent with the best performance. The patent fee is very high and NICHIA has a stringent patent authorization, but this patent will expire in 2017. The white-light LED patents from other companies -- such as Toyota Gosei's orthosilicate fluorescent powder containing Sr, Ba, and Ca, will devalue after 2017. Recently, Toyota Gosei's LED revenue declined and its profit slumped, which made the company be willing to transfer its patents at a low price. In 2014, Toyota Gosei transferred the patent to Harvatek and JuFei Optoelectronics. This was the first time that the mainland Chinese enterprise had gained the white-light LED patent. However, JuFei Optoelectronics is a downstream packaging enterprise, and Toyota Gosei's patent transfer is to get profit and to entrust JuFei Optoelectronics to produce for it.

In 2014, as the companies in LED industry were aggressively expanding industry chain and packaging companies were entering retailing fields of lighting industry. This was particularly true of companies in Mainland China. The MLS Lighting -- the largest packaging enterprise in Chinese Mainland, for instance, was building a huge marketing network, with a network of 300 distributors brought into being in 2014. Its target is to create a network of 3,000 distributors. In August 2014, Tsinghua Tongfang acquired Neo-Neon LED Lighting International, a company listed in Hong Kong. In FY 2014, Neo-Neon reported revenue of HKD841 million and a loss of HKD731 million in net income. But the company had a complete marketing network, which was Tsinghua Tongfang's top concern.

In 2014, Epistar's buyout of Formosa Epitaxy was the largest acquisition in LED industry. When the acquisition was completed, Epistar would have over 400 MOCVDs , more than doubling that of its rivals. In Q4 2014, Epistar's capacity was estimated to hold 11% of the market's total. After the merger, its capacity would increase an additional 4%, far exceeding the 7% for Sanan Optoelectronics and Samsung, which would make it the largest GaN wafer supplier around the world.

Contents

1 LED MARKET

- 1.1 LED Market Size
- 1.2 LED Lighting Market Size
- 1.3 LED Lighting Market Trend
- 1.4 Japan's LED Lighting Market
- 1.5 North America's LED Lighting Market
- 1.6 LED for Large-size BLU Market
- 1.7 Mobile Phone BLU Market
- 1.8 LED Automotive Lighting
 - 1.8.1 LED Automotive Lighting Market
 - 1.8.2 Automotive Interior LED Lighting
 - 1.8.3 Automotive Exterior LED Lighting
- 1.9 Digital Billboard Market

2 LED PACKAGING

- 2.1 Overview of LED Packaging
- 2.2 COB Packaging
- 2.3 Flip Chip Packaging
 - 2.3.1 Introduction
- 2.4 Medium Power LED
- 2.5 Trend of LED Packaging Size

3 LED INDUSTRY CHAIN

- 3.1 LED Industry Chain
- 3.2 Sapphire Ingot Market
- 3.3 Sapphire Ingot Industry
- 3.4 Sapphire Substrate
- 3.5 Rubicon
- 3.6 MOCVD Industry
- 3.7 AIXTRON
- 3.8 VEECO
- 3.9 Geographical Distribution of LED Industry
- 3.10 Global Top 30 LED Vendors by Revenue, 2012-2014
- 3.11 Summary of LED Industry in Mainland China

3.12 White Light LED Patents

4 TAIWANESE LED COMPANIES

- 4.1 Everlight Electronics
- 4.2 Epistar Corporation
- 4.3 Genesis Photonics
- 4.4 Formosa Epitaxy
- 4.5 Lite-On Technology
- 4.6 Advanced Optoelectronic Technology
- 4.7 Bright LED Electronics Corp.
- 4.8 Opto Tech
- 4.9 Harvatek
- 4.10 Tekcore
- 4.11 Unity Opto Technology
- 4.12 Huga Optotech
- 4.13 Lextar Electronics
- 4.14 TYNTEK
- 4.15 Edison Opto

5 LED COMPANIES IN MAINLAND CHINA

- 5.1 Epiligh Technology Co., Ltd.
- 5.2 Hunan HuaLei Optoelectronic Corporation
- 5.3 Hangzhou Silan Azure Co., Ltd.
- 5.4 Sanan Optoelectronics Co., Ltd.
- 5.5 Nantong Tongfang Semiconductor Co., Ltd.
- 5.6 Shandong Inspur Huaguang Optoelectronics Co., Ltd.
- 5.7 Foshan Nationstar Optoelectronics Co. Ltd.
- 5.8 Shanghai Rainbow Optoelectronics Material Co. Ltd.
- 5.9 Dalian Lumei Optoelectronics Corporation
- 5.10 Xiamen Changelight Co., Ltd.
- 5.11 Elec-tech International Co., Ltd.
- 5.12 HC SemiTek Corporation
- 5.13 MLS Lighting Co., Ltd.

6 FOREIGN LED COMPANIES

- 6.1 Cree Inc.

- 6.2 Toyoda Gosei
- 6.3 Nichia Corporation
- 6.4 Osram Opto Semiconductor
- 6.5 Philips Lumileds Lighting Company
- 6.6 Seoul Semiconductor.
- 6.7 LG Innotek
- 6.8 Samsung LED
- 6.9 Lumens Digital Optics Inc.
