Abstracts

Antibody Drug Conjugates are monoclonal antibodies that are attached to biologically active drugs by chemical linkers with labile bonds. They combine the unique targeting property of monoclonal antibodies with the cancer cell killing ability of cytotoxic drugs. These allow discrimination between healthy and diseased tissues. Advancements in coupling monoclonal antibodies to cytotoxic drugs permit better control of drug pharmacokinetics, and significantly improve delivery to target tissue. Potent novel anti-cancer drugs can now be used to target cancers, while minimizing the exposure of healthy tissue. The recent approvals of two potent ADCs - ADCETRIS and Kadcyła, followed by several Antibody Drug Conjugates (ADCs) in pipeline highlight the potential for new therapeutic innovations in this industry.

According to the RNCOS report entitled "Global Antibody Drug Conjugates Market By Drug (ADCETRIS, Kadcyła), Pipeline Analysis (By Phase, Mode of Action, Linker, Technology, and Indication) Outlook 2022", the ADC market is poised to reach US\$ 18.1 Billion by 2022. In this report, there is in-depth market analysis of ADCETRIS and Kadcyła. The market potential of these ADCs is estimated considering that these are being tested in clinical trials for several cancer indications, besides the ones which have already been approved. The depicted ADCs are expected to show their complete market potential soon in the coming years.

Furthermore, in this report, we have structured the information regarding ADCs at various stages of clinical development that are under research or in collaboration, and those individually being developed by companies. The pipeline chapter provides in

depth analysis of ADCs of companies as well as research organizations by clinical phase, indications for which they are being developed, mode of action, type of linker, drugs, and technology. Additionally, the study provides all-inclusive current analysis of various ADCs in advanced as well as early stages of development. Moreover, our report places an emphasis on the major drivers and challenges, latest trends and developments, as well as strategic collaborations that can impact industry's growth.

In the end, the report enlists some of the key players in the ADC market including in-short business overview of each player along with their product and pipeline portfolios, recent developments, and comparative analysis of their strengths and weaknesses. Conclusively, the report will prove to be a complete and comprehensive source of knowledge and analysis for clients and potential investors or debut makers in this industry.

Contents

1. ANALYST VIEW

2. RESEARCH METHODOLOGY

3. ANTIBODY DRUG CONJUGATE (ADC) - AN INTRODUCTION

4. ADC MARKET OUTLOOK TO 2022

4.1 ADCETRIS

4.1.1 Market Potential

4.1.2 Market Size and Forecast to 2022

4.2 Kadcyla

4.2.1 Market Potential

4.2.2 Market Size and Forecast to 2022

5. ADC PIPELINE ANALYSIS

5.1 By Companies

5.1.1 By Clinical Phase

5.1.2 By Indication

5.1.3 By Drug

5.1.4 By Type of Linker

5.1.5 By Mode of Action

5.1.6 By Technology

5.2 By Research Organizations

5.2.1 By Phase

5.2.2 By Indication

5.2.3 By Drug

5.2.4 By Type of Linker

5.2.5 By Mode of Action

6. DRIVERS AND CHALLENGES

6.1 Drivers

6.1.1 Rising Global Cancer Epidemics

6.1.2 Advances in Linking Technologies Re-Instills Hope in ADC

6.1.3 Efforts towards Patent Protection to Drive ADC Market

- 6.1.4 Increasing Demand for Antibody Drug Conjugates
- 6.2 Challenges
 - 6.2.1 Production Hurdles and Cost
 - 6.2.2 Inadequacy of Experienced Manufacturers
 - 6.2.3 Regulatory Challenges

7. MAJOR POTENTIAL ADCS IN PIPELINE

7.1 By Companies

- 7.1.1 Glembatumumab Vedotin Therapeutics /CDX-011 - Celldex
- 7.1.2 Coltuximab Ravtansine/SAR3419 - ImmunoGen Inc.
- 7.1.3 Indatuximab Ravtansine/BT-062 - Biotest
- 7.1.4 Anti-PSMA ADC Therapeutic - Progenics Pharmaceuticals
- 7.1.5 Polatuzumab Vedotin/RG7596 - Roche Genentech
- 7.1.6 DMUC-4064A/RG7882 - Roche Genentech
- 7.1.7 Mirvetuximab Soravtansine/IMGN853 - ImmunoGen Inc.
- 7.1.8 Anti-guanlyl Cyclase C/Anti-GCC ADC - Takeda Millennium

7.2 By Research

- 7.2.1 SGM-101 – SurgiMab in Collaboration with Center for Human Drug Research, Netherlands
- 7.2.2 Panitumumab-IRDye800 – Eben Rosenthal/Stanford University
- 7.2.3 90Yttrium Ibritumomab Tiuxetan (Zevalin) – Biogen Idec in Collaboration with Soroka University Medical Center
- 7.2.4 MOC31-PE – Creative Biolabs in Collaboration with Oslo University Hospital

8. TRENDS AND DEVELOPMENTS

- 8.1 ADC at the Forefront of Treating Hematological Malignancies
- 8.2 ADCs Proving Advantageous for Breast Cancer Patients

9. STRATEGIC COLLABORATIONS IN THE ADC INDUSTRY

10. COMPETITIVE ASSESSMENT

- 10.1 Seattle Genetics, Inc.
- 10.2 F. Hoffman-La Roche Ltd.
- 10.3 ImmunoGen, Inc.
- 10.4 Bayer AG
- 10.5 Novartis AG

10.6 Takeda Pharmaceutical Company Limited

10.7 Immunomedics, Inc.

10.8 Agensys, Inc.

10.9 Concertis Biotherapeutics

10.10 NBE-Therapeutics
